Subject Index

- Acid mine drainage, iron bacteria, 27
 Adsorption, mecoprop, MCP, degradation, soil surface, subsurface, 229
 Adsorption, tricylazole, pesticide, clay materials, soil, 217
 Agricultural samples, ELISA, atrazine, pesticide, environmental samples, 415
 Air pollution, weathering, sandstone, buildings, Belgium, 53
 Amidosulfuron, lysimeter, degradation, phytotoxicity, bioassay, 201
 Analysis, phenoxyalkyls, chlorophenol, capillary zone electrophoresis, 133
 Atrazine, ELISA, pesticide, environmental samples, agricultural samples, 415
 Atrazine, herbicides, river Rhone, gas chromatography-mass spectrometry (GC-MS), 327
 Atrazine, mouse spleen cells, toxicity, 429
 Atrazine, partitioning, γ -HCH, estuaries, colloids, 313
- Belgium, weathering, air pollution, sandstone, buildings, 53
 Bioassay, amidosulfuron, lysimeter, degradation, phytotoxicity, 201
 Biodegradation, triazine pesticides, River Po, possible degradation pathway, 339
 Biological monitoring, pesticides, river pollution, 399
 Biometer systems, pesticides, soil degradation, DT₅₀, lysimeter, 181
 Biotin, monoclonal antibody, *s*-triazine herbicide, terbuthylazine, ELISA, 435
 Blood analysis, dust, lead compounds, condensation, 43
 Buildings, weathering, air pollution, sandstone, Belgium, 53
- ¹⁴C-Labelled pesticides, volatilization, laboratory chamber, pesticides in air, 115
- Capillary gas chromatography, pesticide residue analysis, solid-phase extraction, liquid-liquid extraction, groundwater, high performance liquid chromatography, 297
 Capillary zone electrophoresis, phenoxyalkyls, analysis, chlorophenol, 133
 Carbofuran, pendimethalin, diazinon, photodegradation, lysimeter, leaching, 361
 Carcinogenicity, pesticides, mutagenicity, 371
 Cereals, chlorophenoxy acids, chlorophenols, determinations, herbicides, 259
 Chlorophenol, phenoxyalkyls, analysis, capillary zone electrophoresis, 133
 Chlorophenols, chlorophenoxy acids, determinations, cereals, herbicides, 259
 Chlorophenoxy acids, chlorophenols, determinations, cereals, herbicides, 259
 Chromatography, pesticides, coupled chromatographic techniques, environmental analysis, 105
 Chromium, copper, zinc, foods, Tarragona Province (Spain), daily intake, 3
 Chromium, serum, Denmark, 11
 Citrus crop, pesticide residues, unsaturated zone, 243
 Clay materials, adsorption, tricylazole, pesticide, soil, 217
 Colloids, atrazine, partitioning, γ -HCH, estuaries, 313
 Condensation, dust, lead compounds, blood analysis, 43
 Copper, chromium, zinc, foods, Tarragona Province (Spain), daily intake, 3
 Coupled chromatographic techniques, pesticides, chromatography, environmental analysis, 105
¹³⁷Cs fixation, radiocaesium, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, radioecology, Ravenglass, Esk Estuary, Sellafield, 71

- Cymoxanil, direct monitoring of xenobiotics, multidimensional chromatography (MDC), internal surface reversed-phase ISRP-HPLC, pesticides, destruxins., 381
- Daily intake, copper, chromium, zinc, foods, Tarragona Province (Spain), 3
- Degradation, amidosulfuron, lysimeter, phytotoxicity, bioassay, 201
- Degradation, mecoprop, MCP, adsorption, soil surface, subsurface, 229
- Denmark, chromium, serum, 11
- Density separation, heavy metals, soil, solid speciation, di-iodomethane, 93
- Destruxins, direct monitoring of xenobiotics, multidimensional chromatography (MDC), internal surface reversed-phase ISRP-HPLC, pesticides, cymoxanil, 381
- Determinations, chlorophenoxy acids, chlorophenols, cereals, herbicides, 259
- Di-iodomethane, heavy metals, soil, solid speciation, density separation, 93
- Diazinon, pendimethalin, carbofuran, photodegradation, lysimeter, leaching, 361
- 2,4-Dinitrophenols, herbicides, *pK* values, UV Spectroscopy, 125
- Direct monitoring of xenobiotics, multidimensional chromatography (MDC), internal surface reversed-phase ISRP-HPLC, pesticides, cymoxanil, destruxins, 381
- DT₅₀, pesticides, soil degradation, biometer systems, lysimeter, 181
- Dust, lead compounds, condensation, blood analysis, 43
- ELISA, atrazine, pesticide, environmental samples, agricultural samples, 415
- ELISA, monoclonal antibody, *s*-triazine herbicide, terbuthylazine, biotin, 435
- Environmental analysis, pesticides, chromatography, coupled chromatographic techniques, 105
- Environmental samples, ELISA, atrazine, pesticide, agricultural samples, 415
- Esk Estuary, ¹³⁷Cs fixation, radiocaesium, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, radioecology, Ravenglass, Sellafield, 71
- Estuaries, atrazine, partitioning, γ -HCH, colloids, 313
- Fenitrothion, photodegradation, pesticides, mass spectrometric characterization, propazine, 283
- Food, pesticides, residues, Switzerland, 275
- Foods, copper, chromium, zinc, Tarragona Province (Spain), daily intake, 3
- Gas chromatography-mass spectrometry (GC-MS), herbicides, river Rhone, atrazine, 327
- GC/MS, phenoxyalkanoic acids, herbicides, ion trap, 141
- Groundwater, pesticide residue analysis, solid-phase extraction, liquid-liquid extraction, capillary gas chromatography, high performance liquid chromatography, 297
- γ -HCH, atrazine, partitioning, estuaries, colloids, 313
- Heavy metals, soil, solid speciation, density separation, di-iodomethane, 93
- Herbicides, 2,4-dinitrophenols, *pK* values, UV spectroscopy, 125
- Herbicides, chlorophenoxy acids, chlorophenols, determinations, cereals, 259
- Herbicides, phenoxyalkanoic acids, GC/MS, ion trap, 141
- Herbicides, river Rhone, gas chromatography-mass spectrometry (GC-MS), atrazine, 327
- Heterogeneity, pesticides, leaching, soil, oscillating flow, 167
- High performance liquid chromatography, pesticide residue analysis, solid-phase extraction, liquid-liquid extraction, groundwater, capillary gas chromatography, 297
- HPLC, phenoxy acids, on-line preconcentration, water, 349
- Internal surface reversed-phase ISRP-HPLC, direct monitoring of xenobiotics, multidimensional chromatography (MDC), pesticides, cymoxanil, destruxins, 381

- Ion trap, phenoxyalkanoic acids, herbicides, GC/MS, 141
- Iron bacteria, acid mine drainage, 27
- Laboratory chamber, volatilization, ^{14}C -labelled pesticides, pesticides in air, 115
- Langmuir model, radiocaesium, ^{137}Cs fixation, sorption isotherms, sequential extraction, X-ray diffraction, radioecology, Ravenglass, Esk Estuary, Sellafield, 71
- Leaching, movement, soil columns, residual herbicides, 155
- Leaching, pendimethalin, carbofuran, diazinon, photodegradation, lysimeter, 361
- Leaching, pesticides, soil, heterogeneity, oscillating flow, 167
- Lead compounds, dust, condensation, blood analysis, 43
- Liquid-liquid extraction, pesticide residue analysis, solid-phase extraction, groundwater, capillary gas chromatography, high performance liquid chromatography, 297
- Lysimeter, amidosulfuron, degradation, phytotoxicity, bioassay, 201
- Lysimeter, pendimethalin, carbofuran, diazinon, photodegradation, leaching, 361
- Lysimeter, pesticides, soil degradation, DT_{50} , biometer systems, 181
- Mass spectrometric characterization, photodegradation, pesticides, fenitrothion, propazine, 283
- Mass spectrometry, organophosphorus, 147
- MCCP, mecoprop, degradation, adsorption, soil surface, subsurface, 229
- Mecoprop, MCCP, degradation, adsorption, soil surface, subsurface, 229
- Monoclonal antibody, *s*-triazine herbicide, terbutylazine, ELISA, biotin, 435
- Mouse spleen cells, atrazine, toxicity, 429
- Movement, leaching, soil columns, residual herbicides, 155
- Multidimensional chromatography (MDC), direct monitoring of xenobiotics, internal surface reversed-phase ISRP-HPLC, pesticides, cymoxanil, destruxins, 381
- Mutagenicity, pesticides, carcinogenicity, 371
- On-line preconcentration, phenoxy acids, HPLC, water, 349
- Organophosphorus, mass spectrometry, 147
- Oscillating flow, pesticides, leaching, soil, heterogeneity, 167
- pK Values, 2,4-dinitrophenols, herbicides, UV spectroscopy, 125
- Partitioning, atrazine, γ -HCH, estuaries, colloids, 313
- Pendimethalin, carbofuran, diazinon, photodegradation, lysimeter, leaching, 361
- Pesticide residue analysis, solid-phase extraction, liquid-liquid extraction, groundwater, capillary gas chromatography, high performance liquid chromatography, 297
- Pesticide residues, unsaturated zone, citrus crop, 243
- Pesticide, adsorption, tricyclazole, clay materials, soil, 217
- Pesticide, ELISA, atrazine, environmental samples, agricultural samples, 415
- Pesticides in air, volatilization, laboratory chamber, ^{14}C -labelled pesticides, 115
- Pesticides, biological monitoring, river pollution, 399
- Pesticides, carcinogenicity, mutagenicity, 371
- Pesticides, chromatography, coupled chromatographic techniques, environmental analysis, 105
- Pesticides, direct monitoring of xenobiotics, multidimensional chromatography (MDC), internal surface reversed-phase ISRP-HPLC, cymoxanil, destruxins, 381
- Pesticides, leaching, soil, heterogeneity, oscillating flow, 167
- Pesticides, photodegradation, mass spectrometric characterization, fenitrothion, propazine, 283

- Pesticides, residues, food, Switzerland, 275
- Pesticides, soil degradation, DT₅₀, biometer systems, lysimeter, 181
- Phenoxy acids, on-line preconcentration, HPLC, water, 349
- Phenoxyalkanoic acids, herbicides, GC/MS, ion trap, 141
- Phenoxyalkyls, analysis, chlorophenol, capillary zone electrophoresis, 133
- Photodegradation, pendimethalin, carbofuran, diazinon, lysimeter, leaching, 361
- Photodegradation, pesticides, mass spectrometric characterization, fenitrothion, propazine, 283
- Phytotoxicity, amidosulfuron, lysimeter, degradation, bioassay, 201
- Possible degradation pathway, triazine pesticides, River Po, biodegradation, 339
- Propazine, photodegradation, pesticides, mass spectrometric characterization, fenitrothion, 283
- Radiocaesium, ¹³⁷Cs fixation, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, radioecology, Ravenglass, Esk Estuary, Sellafield, 71
- Radioecology, radiocaesium, ¹³⁷Cs fixation, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, Ravenglass, Esk Estuary, Sellafield, 71
- Ravenglass, radiocaesium, ¹³⁷Cs fixation, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, Esk Estuary, Sellafield, 71
- Residual herbicides, movement, leaching, soil columns, 155
- Residues, pesticides, food, Switzerland, 275
- River Po, triazine pesticides, biodegradation, possible degradation pathway, 339
- River pollution, biological monitoring, pesticides, 399
- River Rhone, herbicides, gas chromatography-mass spectrometry (GC-MS), atrazine, 327
- Sandstone, weathering, air pollution, buildings, Belgium, 53
- Sellafield, radiocaesium, ¹³⁷Cs fixation, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, Ravenglass, Esk Estuary, 71
- Sequential extraction, radiocaesium, ¹³⁷Cs fixation, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, Ravenglass, Esk Estuary, Sellafield, 71
- Serum, chromium, Denmark, 11
- Soil columns, movement, leaching, residual herbicides, 155
- Soil degradation, pesticides, DT₅₀, biometer systems, lysimeter, 181
- Soil surface, mecoprop, MCP, degradation, adsorption, subsurface, 229
- Soil, adsorption, tricylazol, pesticide, clay materials, 217
- Soil, heavy metals, solid speciation, density separation, di-iodomethane, 93
- Soil, pesticides, leaching, heterogeneity, oscillating flow, 167
- Solid speciation, heavy metals, soil, density separation, di-iodomethane, 93
- Solid-phase extraction, pesticide residue analysis, liquid-liquid, extraction, groundwater, capillary gas chromatography, high performance liquid chromatography, 297
- Sorption isotherms, radiocaesium, ¹³⁷Cs fixation, sorption isotherms, Langmuir model, sequential extraction, X-ray diffraction, Ravenglass, Esk Estuary, Sellafield, 71
- Subsurface, mecoprop, MCP, degradation, adsorption, soil surface, 229
- Switzerland, pesticides, residues, food, 275
- Tarragona Province (Spain), copper, chromium, zinc, foods, daily intake, 3
- Terbuthylazine, monoclonal antibody, s-triazine herbicide, ELISA, biotin, 435
- Toxicity, atrazine, mouse spleen cells, 429
- s-Triazine herbicide, monoclonal antibody, terbuthylazine, ELISA, biotin, 435
- Triazine pesticides, River Po, biodegradation, possible degradation pathway, 339
- Tricylazol, adsorption, pesticide, clay materials, soil, 217

Unsaturated zone, pesticide residues, citrus crop, 243

UV spectroscopy, 2,4-dinitrophenols, herbicides, p*K* values, 125

Volatilization, laboratory chamber, ¹⁴C-labelled pesticides, pesticides in air, 115

Water, phenoxy acids, on-line preconcentration, HPLC, 349

Weathering, air pollution, sandstone, buildings, Belgium, 53

X-Ray diffraction, radiocaesium, ¹³⁷Cs fixation, sorption isotherms, Langmuir model, sequential extraction, radioecology, Ravenglass, Esk Estuary, Sellafield, 71

Zinc, copper, chromium, foods, Tarragona Province (Spain), daily intake, 3
